

BIG Z – BROILER BREEDERS

Featuring dedicated male and female drinker lines and gender specific drinkers.

PROVEN BENEFITS:

Hygienic water delivery / Durable and wear-resistant / Keeps litter and slats dry / Efficient and effective flushing / Eliminates routine cleaning / Enhances Male Uniformity / Affords ad libitum water

1

Broiler breeders are large birds that strike the drinkers with much more force when compared to other types of poultry. This can lead to water spillage and drinkers that wear out too quickly. Ziggity's Big Z is the only fully enclosed drinker engineered to solve these problems.

2

Big Z Drinkers are engineered with exacting tolerances that deliver all of the hygienic water broiler breeders need, while keeping litter and slats dry. And a dry house means far less ammonia release that directly improves bird welfare.

3

Because Big Z Drinkers are much larger and much more durable than conventional nipples or standard drinkers, they are also far more resistant to wear and water spillage. So Big Z keeps performing year after year, affording enhanced laying performance, feed efficiency and livability.

4

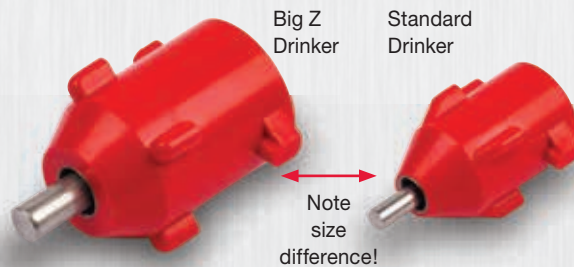

Our 10-year prorated warranty is all the assurance you need. It is another example of how Ziggity improves results through innovation.

GENDER SPECIFIC DRINKERS - TO PROMOTE BIRD WELFARE AND ENHANCE PRODUCTION

Big Z Drinker Benefits

At three times the weight of the standard drinker, Big Z is the most durable drinker available to meet the demanding needs of large aggressive broiler breeders.

- Corrosion-resistant stainless steel components for long life.
- Twin-lock design keeps drinkers secure in the drinker saddle
- Hardened stainless steel inserts helps prevent drinker wear.

Big Z Drinker for Males

This dedicated male drinker is positioned off the floor much higher than the female drinker - so high in fact that females cannot reach it, which is the reason the shield is not necessary.

DO NOT attempt to use standard-sized drinkers in Broiler Breeder Applications.

Big Z Shielded Drinker for Females

This dedicated female shielded drinker promotes drinking at the proper angle to minimize water spillage - especially important when males attempt to drink from the female drinker line.

BIGZ

Robust System For Broiler Breeders

The Big Z system is engineered to be robust and wear-resistant to meet the demands of broiler breeder operations. Pictured: Dedicated female drinker line.

The same concept that made Ziggity the leader in broiler watering, only bigger and tougher for larger broiler breeders.

Regulator

Delivers high water volume at the low pressure required for no-spill drinking. Built-in flush valve makes for easy removal of sediment, biofilm and air.

Solenoid Regulator

For automatic and unattended system flushing – requires connection to a controller or timer with a 24 VAC output.

Slope Neutralizer

Reduces slope pressure by a preset amount, requires no adjustment and maintains system pressure setting even when birds are not drinking. Required in sloped houses only.

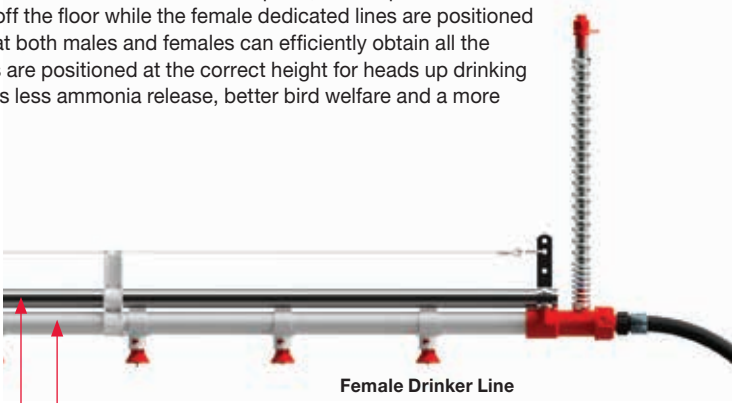

End Assembly

Opens automatically during the flush mode for easy and effective flushing.

Ziggity's Big Z Broiler Breeder watering system addresses the size difference between the male and female broiler breeder. Because male breeders are much taller than their female counterparts, their separate and dedicated drinker lines are positioned much higher off the floor while the female dedicated lines are positioned much lower. This gender dedicated setup means that both males and females can efficiently obtain all the hygienic water they need as their dedicated drinkers are positioned at the correct height for heads up drinking that minimizes or eliminates spillage. And that means less ammonia release, better bird welfare and a more productive environment.

Male Drinker Line

Female Drinker Line

Galvanized Support Pipe
Ziggity's round profile support pipe provides maximum strength and stability for reduced drinker line sway.

Large Diameter Pipe
Industry's largest water-bearing pipe has virtually no obstructions for more effective flushing.

100% FOCUSED

Ziggity Support:

As the only manufacturer 100 percent focused on poultry watering, Ziggity provides a number of available resources to optimize bird and system performance.
