

COMMERCIAL LAYER SYSTEM

For excellent bird performance and improved bird health.

PROVEN BENEFITS:

Keeps pits, slats & litter drier / Improves egg production / Lowers labor costs / Prevents spillage
Delivers hygienic water / Flushes easily / Reduces biofilm buildup / Easy to install and maintain

1

Water plays a critical role in attaining and maintaining optimal egg production. With too little water, egg production suffers; too much water creates wet manure belts, slats or pits. The key to superior performance is a Ziggity Commercial Layer System that delivers the right amount of clean, fresh water to your birds all day, every day.

2

The heart of the system is the Ziggity Max8 drinker made with materials that resist corrosion and wear, resulting in years of leak-free performance. This means belts, slats and pits stay drier, which minimizes fly and odor problems.

3

A highly efficient regulator keeps drinker lines charged with low-pressure water, allowing birds to drink without spillage. Plus, all Ziggity regulators come with a built-in flush feature for flushing the system quickly and easily, thereby preventing biofilm buildup.

4

For a drier environment and excellent results, insist on Ziggity being a part of your layer system. You'll get extra peace of mind knowing your watering system carries a 10-year, prorated drinker warranty from the only company focused on watering systems for poultry.

Max8 Drinker Benefits

- Heavier shut-off ball is less likely to rattle off the seat when bird movement causes vibration, reducing the chance of seepage.
- Corrosion-resistant stainless steel components for long life.
- Exclusive twin-lock design keeps drinkers secure on pipe.
- Hardened stainless steel insert prevents drinker wear.

Pipe interiors have virtually no obstruction for effective flushing and the smooth inner wall inhibits biofilm formation for easier cleaning and healthier birds.

MAX8

Advanced Drinker Technology

Designed exclusively for layers to complement the way they drink, delivering the right amount of water birds need without oversupply.

Ziggity Systems.

A system that delivers the right amount of water...always.

Flush Regulator

Delivers high water volume at the low pressure required for no-spill drinking. Built-in flush valve makes for easy removal of sediment, biofilm and air.

Auto Flush Regulator

For automatic and unattended system flushing – requires connection to a controller or timer with a 24 VAC output.

Control Clock for Flushing

Can be programmed to automatically activate the flush mode for up to 12 Ziggity Solenoid Regulators.

Big Ace, 1 in PVC, Ace Pipe

Made of durable plastic material, this pipe is cost-effective and highly UV- and chemical-resistant. Pipe interior has virtually no obstruction for effective flushing.

10-Year Prorated Drinker Warranty

on select drinker models illustrates our commitment to the quality of Ziggity drinkers.
